In computer science, top-down parsing is a parsing strategy where one first looks at the highest level of the parse tree and works down the parse tree by using the rewriting rules of a formal grammar. LL parsers are a type of parser that uses a top-down parsing strategy.. Top-down parsing is a strategy of analyzing unknown data relationships by hypothesizing general parse tree structures and ...

INTRODUCTION . The single most effective optimization technique is to use a profiler to identify performance bottlenecks. It's often difficult to guess what part of your program is consuming the most resources, and if you base your optimization efforts on speculation instead of real data, you'll waste a lot of time speeding up the parts of your program that were fast already.
