Economics (/ ɛ k ə ' n ɒ m ɪ k s, i: k ə -/) is the social science that studies the production, distribution, and consumption of goods and services.. Economics focuses on the behaviour and interactions of economic agents and how economies work. Microeconomics analyzes basic elements in the economy, including individual agents and markets, their interactions, and the outcomes of interactions.

1. What is homeostasis? The idea behind homeostasis originated with the French physiologist Claude Bernard, in the late nineteenth century. Bernard noted that living systems needed to maintain numerous variables of their internal milieu within fairly narrow ranges so that life would continue and did so quite naturally (Bernard, 1878).The essence of the internal milieu (milieu intérieur in the ...
