Risk is the possibility of losing something of value. Values (such as physical health, social status, emotional well-being, or financial wealth) can be gained or lost when taking risk resulting from a given action or inaction, foreseen or unforeseen (planned or not planned). Risk can also be defined as the intentional interaction with uncertainty. ...

"The current world population of 7.3 billion is expected to reach 8.5 billion by 2030, 9.7 billion by 2050, and 11.2 billion in 2100, according to a United Nations report released today. The revised U.N. estimates counter previous projections, which had said that global population would peak at roughly 9 billion by 2050, then gradually decline.

Criteria for effective marketing plans. Marketing plans should meet several criteria: The plan must be specific enough so that it can be implemented and communicated to people in the firm. "Improving profitability" is usually too vague, but increasing net profits by 5%, increasing market share by 10%, gaining distribution in 2,000 more stores, and reducing manufacturing costs by 2% are all ...

Saying that it has always been this way, doesn't count as a legitimate justification to why it should stay that way. Teacher and administrators all over the world are doing amazing things, but some of the things we are still doing, despite all the new solutions, research and ideas out there is, to put it mildly, incredible.

This is a really good and important point. Let me explain my reasoning why I think a GTX 580 is still good. The problem with no cuDNN support is really that you will require much more time to set everything up and often cutting-edge features that are implemented in libraries like torch7 will not be available.
