Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Featuring 15 Ph.D. scientists, Evolution's Achilles' Heels directly demolishes the very pillars of the belief system that underpins our now-secular culture—evolutionary naturalism. It's coupled with the Biblical command to reach the lost with the Bible's Good News. In a nutshell, it's a comprehensive outreach tool like no other.

Question: "What is theistic evolution?" Answer: Theistic evolution is one of three major origin-of-life worldviews, the other two being atheistic evolution (also commonly known as Darwinian evolution and naturalistic evolution) and special creation. Versions of theistic evolution come somewhere between one of two extremes. One view is close to deism, which says God allows only natural ...

A binary star is a star system consisting of two stars orbiting around their common barycenter. Systems of two or more stars are called multiple star systems. These systems, especially when more distant, often appear to the unaided eye as a single point of light, and are then revealed as multiple by other means.

Enthalpy. Enthalpy change is the amount of energy as heat that is lost or gained by a system. Every bond between molecules has a specific amount of energy in it. That means that you can figure out ...

**Endothermic and Exothermic Reactions - Study.com**

The evolutionary system has been entrenched for so long that many people who otherwise accept the Bible as infallible have deemed it expedient to compromise on this issue. Thus, evolution has been called, "God's method of creation"; and the Genesis record of the six days of creation has been reinterpreted in terms of the evolutionary ages of historical geology.

**Evolution and the Bible | The Institute for Creation Research**

All of us are familiar with the term evolution. When I was a science major at the university, every subject that I studied — biology, botany, ecology, microbiology — was taught from the point of view of evolution.
