Many people believe that diamonds are formed from the metamorphism of coal. That idea continues to be the "how diamonds form" story in many science classrooms. Coal has rarely - if ever - played a role in the formation of diamonds. In fact, most diamonds that have been dated are much older than ...

How Do Diamonds Form? | They Don't Form From Coal! - Geology

What We Really Know about the Geologic Column. Before we begin looking at the geologic column, it is important to understand the key differences between the starting assumptions of young-earth geologists and old-earth geologists.

Global Flood Geology "If I, as a geologist, were called upon to explain briefly our modern ideas of

the origin of the earth and the development of life on it to a simple, pastoral people, such as the tribes to whom the Book of Genesis was addressed, I could hardly do better than follow rather closely much of the language of the first chapter of Genesis."
