For the best answers, search on this site <https://shorturl.im/aykTM> The water cycle has no starting point. But, we'll begin in the oceans, since that is where most of Earth's water exists. The sun, which drives the water cycle, heats water in the oceans. Some of it evaporates as vapor into the air. Ice and snow can sublime directly into water ...

describe the water cycle of the savanna biome? | Yahoo Answers

The World Biome template was designed as a strategy for visual learners to make connections in reporting through a graphic organizer. The template also includes the social studies concepts of the human environment interaction encouraging students to look for ways humans are contributing to change in the world.
