Intermolecular forces exist between molecules and influence the physical properties. We can think of H<sub>2</sub>O in its three forms, ice, water and steam. In all three cases, the bond angles are the same, the dipole moment is the same, the molecular shape is the same and the hybridization of the oxygen is the same.

Worksheet 15 - Intermolecular Forces ... Intermolecular forces (IMF) can be qualitatively ranked using Coulomb's Law:  $force \propto \frac{Q_1 Q_2}{r^2}$  where  $Q_1$  and  $Q_2$  are charges and  $r$  is the distance between them. The obvious consequences of this relationship are that: ... Molecular geometry also plays a role in
