LAB ___: CLONING PAPER PLASMID In this exercise you will use paper to simulate the cloning of a gene from one organism into a bacterial plasmid using a restriction enzyme digest. The plasmid (puc18 plasmid) can then be used to transform bacteria so that it now expresses a new gene and produces a new protein. 1. From the white paper, cut out the ...

Best Answer: 1) So that the Glo gene would be transcribed and expressed, so we can see that we have successfully transformed the cells into which we place the engineered plasmid. 2) Insufficient information. If there is a EcoR1 site in either the middle of the Glo gene, or in the middle of the selectable marker site in the plasmid, it would likely disable either Glo, or the plasmid.

Molecular Biology & Biotechnology Cloning a Paper Plasmid. This lab is a nice quick paper demo on the process of cloning a gene into a plasmid. It reviews the concepts of restriction enzymes, "sticky ends", cloning, and transformation. It is helpful to get a picture in students' heads of the process.
