Activities. Distinguish between chemical and physical changes with this "Changes in Matter" activity. Prepare unknown samples of heterogeneous mixtures, homogeneous mixtures (solutions), and pure substances, then use this "Classifying Chemicals Using Properties" activity. It includes an evaluation in PDF form.

The Study of Matter - Awesome Science Teacher Resources

This lesson builds upon the previous lesson about the scientific method and allows students to put the vocabulary and concepts they learned into practice. Since experiments can be a time-consuming process in a science course, I find it worth the time early in the year to have students evaluate flawed experiments to understand the importance of careful experimental design.

Ninth grade Lesson Evaluating Existing Experimental Designs

4 8 16 In the first call to the function, we only define the argument a, which is a mandatory, positional argument. In the second call, we define a and n, in the order they are defined in the function. Finally, in the third call, we define a as a positional argument, and n as a keyword argument.. If all of the arguments are optional, we can even call the function with no arguments.
