Skin cancer is a disease in which malignant (cancer) cells form in the tissues of the skin. The skin is the body's largest organ. It protects against heat, sunlight, injury, and infection. Skin also helps control body temperature and stores water, fat, and vitamin D. The skin has several layers, but the two main layers are the epidermis (upper or outer layer) and the dermis (lower or inner layer).

We recently decided to show a movie to our 6th, 7th and 8th grade students on the last day of school. But when we started brainstorming ideas we had some difficulty coming up with movie titles that (a) the students would like and (b) we thought would be worth showing.. Listed below are the movies we came up with after consulting a variety of experts including: current middle school students ...
